Make a difference in Merton

## NO<sub>2</sub> Diffusion Tube Network

If you are interested in Air Quality and want to know how you can help, why not join us in helping to expand our network of NO<sub>2</sub> Diffusion Tubes across Merton.

It only takes 10 minutes of your time once a month, to help swap an exposed Diffusion tube with a new one, and then post it back to us. We send the tubes off to the laboratory, and the data from all of the tubes helps Merton Council obtain important data which helps to monitor air quality and make evidence-based decisions on air quality policy.
